

# Iowa Protection Order & 24/7 County Dispatch/Records Responsibility Flow Chart

\* When a clerk of court makes a change to any protection order record in ICIS, the entire base record in the IOWA System is modified. This means any changes the 24/7 county dispatch/records have made to the **base** record will be overwritten. This is why **all enhancements or corrections to the base record must be made as supplemental entries**.

\*\* While a secondary review of emergency protective orders is not required due to their temporary nature, **inclusion of any known CMCs for the defendant shall be added to emergency protective order records**.
